

# Anaesthetic Emergency Protocol - Haemorrhage

## SIGNIFICANT HAEMORRHAGE?

Give bolus IV fluids (10ml/kg)

Keep your finger on the pulse continuously - monitor HR, gum colour, CRT

Not breathing?

Place endotracheal tube

Support breathing with 'Ambu' bag.  
Never blow down the tube

Still haemorrhaging  
with pale gums,  
increasing HR?

Repeat fluid bolus  
(10ml/kg)

Bradycardia present  
( $<40$  bpm)?

Follow 'Bradycardia  
Protocol'
